Professional Profile

Motivated undergraduate expecting to complete the degree in 2027 in Information Technology specialized in Software Engineering with strong problem-solving, analytical, teamwork, and leadership skills. Proficient in software development concepts and modern technologies, with a passion for building innovative solutions. Seeking an opportunity to gain hands-on experience in software engineering while contributing to organizational success through dedication, continuous learning, and technical expertise.

Education

BSc (Hons) Information Technology Specialized in SE

Sri Lanka Institute of Information Technology (SLIIT)

2023-Present

GCE Advanced Level (Commerce Stream): 3C (Information Technology, Economics, Accounting)

Central College Piliyandala

2020-2022

GCE Ordinary Level: 3A, 3B, 3C

Central College Piliyandala

2014-2019

Projects

1. SL Accounting(kalumwaduge.com) - <https://github.com/Seneth-Jayashan/sl-accounting>

Designed and developed a full-stack MERN-based Learning Management System in collaboration with a team member, enabling course creation, lesson management, student enrollment, and progress tracking through an interactive web platform.

- MERN Full-Stack
- Responsive UI Design
- Course & Lesson Management

2. HealthBridge - <https://github.com/Seneth-Jayashan/HealthBridge>

Worked as part of a development team to build a scalable telemedicine platform featuring online consultations, appointment management, secure payments, and AI-assisted healthcare services. Responsible for implementing the video consultation and prescription management modules.

- Developed Real-Time Video Consultation Module
- Developed Digital Prescription Management System
- Docker & Kubernetes for Containerized Deployment

3. Learn bridge- <https://github.com/Seneth-Jayashan/LearnBridge>

Worked in a team to develop a full-stack learning management platform that enables students to access educational content, attend virtual classes, and utilize knowledge resources through a centralized web application.

- MERN Full-Stack Development
- Course, Lesson, and Subject Management
- Zoom Integration for Virtual Learning Sessions
- Cloudinary Integration for File and Media Handling
- Knowledge Base Management System
- REST API Development & Database Design

4. **Rural link-** <https://github.com/Seneth-Jayashan/Rural-Link>

Worked in a team to develop a MERN-based delivery management platform for rural entrepreneurs. Responsible for implementing interactive map features, route visualization, and real-time delivery tracking to improve last-mile logistics operations.

- MERN Full-Stack Development
- Live Tracking with Socket.IO
- Map & Route Integration (Leaflet, OpenStreetMap, OSRM, Nominatim)
- API Authentication & Responsive UI Development
- Team Collaboration & Git Version Control

5. **Kick Store-** <https://github.com/SajanaWickramarathna/CSdrop>

Designed and developed a full-stack MERN e-commerce application enabling product browsing, ordering, and customer management with real-time data updates.

- MERN Full-Stack
- API Auth
- Tailwind CSS
- AI Chat-bot

6. **SPARK-** <https://github.com/Seneth-Jayashan/Spark>

System for managing volunteers, organizations, and events, featuring authentication, role-based access, group chat, and a fully responsive design.

- MERN Full-Stack
- API Auth
- Tailwind CSS
- Socket.io - Group chat

7. **Care link-** <https://github.com/Seneth-Jayashan/Care-Link-LK>

Care Link LK is a healthcare web application for managing appointments, patient records, role-based access, notifications, and QR code-based report generation and retrieval.

- MERN Full-Stack
- API Auth
- Tailwind CSS
- Vite

8. **KHB Associate-** <https://github.com/SajanaWickramarathna/KHB-E-com>

A modern web application for a textile machinery sales company, featuring a responsive interface, product catalog, authentication, and order management with real-time updates.

- MERN Full-Stack
- API Auth
- Tailwind CSS
- Socket.io- 1 to 1 Chat

9. **Finora-** <https://github.com/SajanaWickramarathna/finora>

Finora is an Android budgeting app that enables users to track income and expenses, manage budgets, and receive notifications, using local storage for authentication and data handling.

- Kotlin
- XML Layouts
- Shared Preferences
- Firebase

10. **PCIFY-** <https://github.com/SajanaWickramarathna/PCIFY>

Android UI design for a PC components shopping app, focused on a clean, intuitive browsing and product selection experience.

- Kotlin
- XML Layouts

11. KASSS Advertising- <https://github.com/Seneth-Jayashan/KASSS-Advertising-Agency>

KASSS is an advertising agency website that showcases marketing campaigns, client case studies, and testimonials through a responsive and visually engaging interface.

- HTML
- MySQL
- CSS
- PHP

12. Clean wave- <https://github.com/Seneth-Jayashan/CleanWave>

CleanWave Laundry System is a Java-based web application for managing laundry orders and invoices, featuring role-based dashboards, real-time tracking, and an MVC architecture.

- Java (Servlets)
- MySQL
- CSS
- MVC

13. Portfolio- <https://github.com/SajanaWickramarathna/Portfolio>

Built a personal portfolio website using React to professionally present software engineering projects, technical skills, certifications, and career achievements through a responsive and user-friendly interface.

- React.js
- Responsive Web Design
- Project & Skill Showcase
- Interactive User Interface

Articles

Published technical and design case studies showcasing full-stack development and UI/UX design processes.
